The 21st-century African land rush

Worldwide, up to 115 million acres of farmland are leased to foreign investors, and the bulk of that is in Africa. Food security and the push to produce biofuels drive the land rush. This map shows a sampling of reported land deals in Africa.

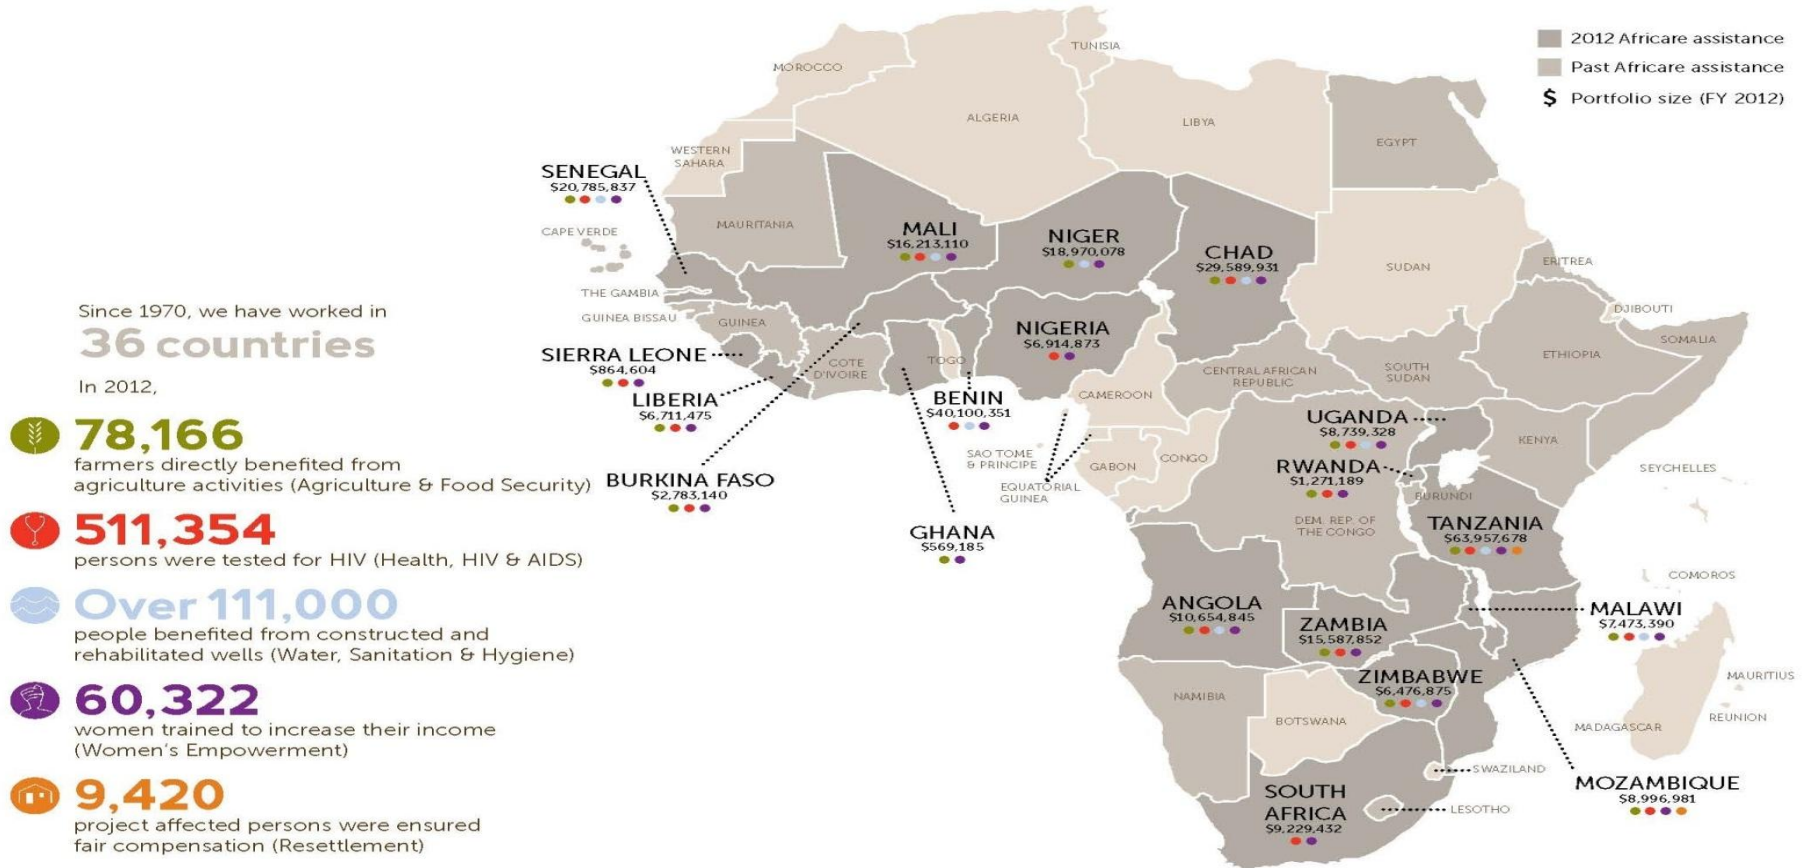

LARGE-LANE ADAPTATIONS IN THREE COUNTRIES

COUNTRY	PROJECTS	AREA (sq km)	Domestic Share ^a
Sudan	112	9.8 million	76
Mozambique	405	6.6 million	53
Liberia	17	4.0 million	7
Ethiopia	406	2.9 million	49
Cambodia (Kula)	61	2.6 million	70
Nigeria	135	2.0 million	87

WHERE WE WORK

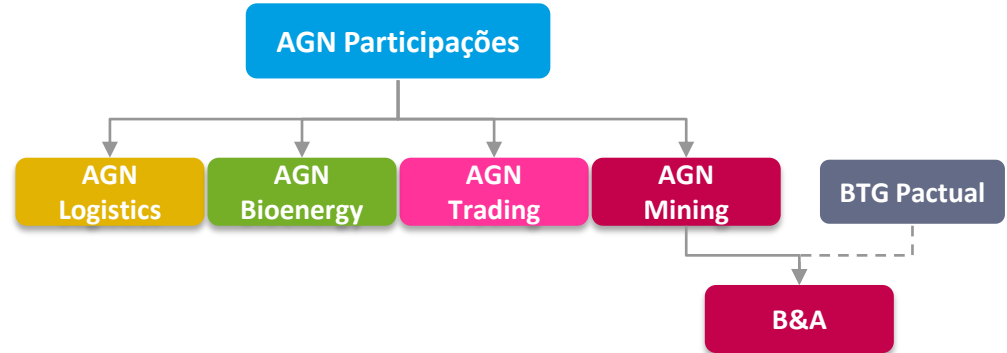

AGN Company Overview

- AGN is a company focused in mining, bioenergy and logistics
- Executive team with long and successful track record in each of the company's areas
- Strategic partnerships with leading local and global players

Company structure

Operational expertise

- Executive team with proven track record of selecting, implementing and operating multi-billion cross border projects in mining, energy and logistics
- Capability to identify and analyze different projects globally, allowing to focus resources on the potentially greater value generating projects

Transactional experience

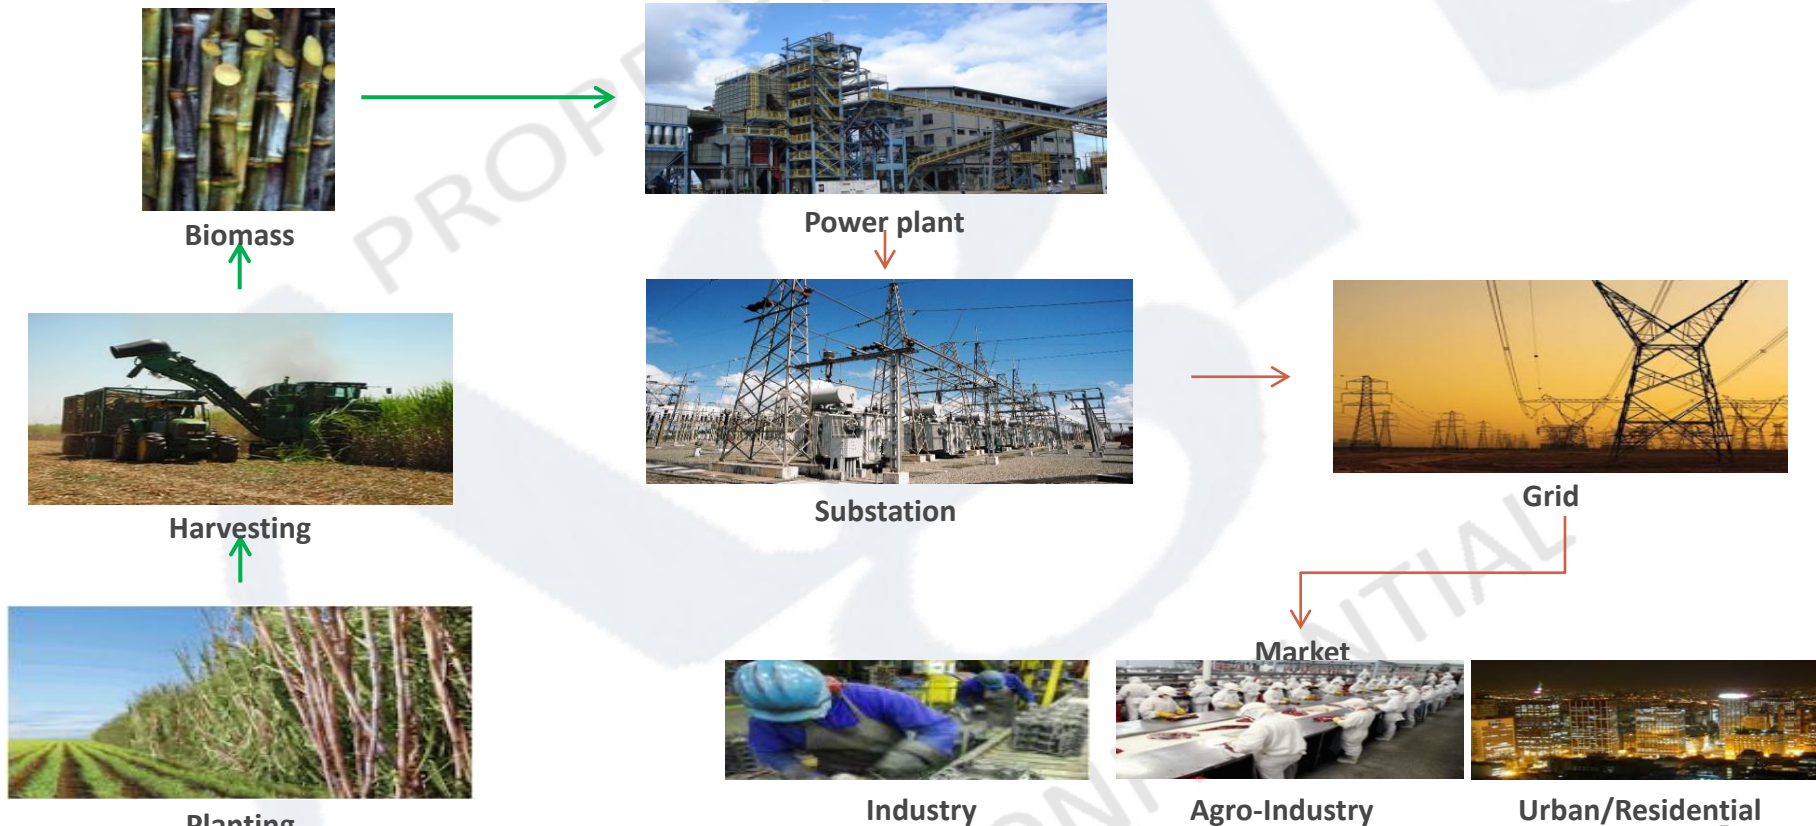

- Executives responsible for coordinating some of the most challenging transactions in our sectors, both mergers and capital raising
- Quick assessment of potential issues and experience in finding the best suited advisors for each deal

Extensive global network

- Extensive network of contacts both locally and globally, providing constant dealflow, opportunities and potential partnerships

AGN BIOENERGY and AFRICARE IN PARTNERSHIP

Integrated project: distributed power generation – energy cane

Small Farmers and Africare

Initially, 1,800 small holder families could generate up to 10% of the feedstock for each project

Organize	Build	Link	Resettlement
<ul style="list-style-type: none">▪ Aggregate small-holder farmers into associations of approximately 25 producers each, including both men and women	<ul style="list-style-type: none">▪ Training to build producer capacity in three key areas:<ul style="list-style-type: none">✓ how to produce energy cane✓ utilizing inputs to improve quantity and quality of production✓ management, accounting, marketing, sales, and contracts	<ul style="list-style-type: none">▪ Integrate associations into AGN Hub and also provide integration into other food markets to supplement income	<ul style="list-style-type: none">▪ Africare designs and implements all resettlement programs in accordance with World Bank Operational Policy 4.12 on Involuntary Resettlement▪ Africare's core competencies, expertise in working with communities, and integrated approach often leads to increased living standards for Project-Affected Persons (PAPs)

Through AGN-provided access to inputs, yields of traditional crops will increase, improving food security outcomes for local communities
